MAKING PASSION HEARD

Making Passion Heard.

In 2017, the former AKG manager Martin Seidl founded the Viennese start-up, which is currently active in more than 60 countries around the world. Stars like Divinity Roxx (Beyoncé, Jay-Z, Erykah Badu), Kat Dyson (Prince, New Power Generation), Martin "Ace" Kent (Skunk Anansie), are fans of Austrian Audio products, as well as numerous producers and sound engineers: Adrian Hall (The Black Eyed Peas, Robbie Williams, and others), Jim Ebdon (Sam Smith, Maroon 5) and Obie O'Brien (Bon Jovi, Barbara Streisand, Alice Cooper).

40 pro audio experts with more than 350 years of combined experience (the majority are former AKG employees) are behind the brand, and make sure Austrian Audio stands for innovative quality products with appealing designs, offering an unadulterated and excellent sound experience for musicians, audio professionals and sound aficionados.

Austrian Audio continues the longstanding Austrian tradition of designing and manufacturing high-quality and durable audio equipment.

MAKING PASSION HEARD

PG16 – Pro Gaming Headset

High-quality pro sound for discerning gamers

The Austrian Audio Pro Gaming Headset PG16 offers you everything you need as a real gamer. First and foremost, crystal clear, high-resolution sound with perfect spatiality, which allows you to precisely locate even the quietest details. No opponent creeps up unnoticed and you get a clear edge on the virtual battlefield. The spectacular sound experience is provided by the highly acclaimed 44mm Hi-X drivers. So you get exactly the same outstanding Austrian Audio High Excursion technology already used in the Pro Audio models Hi-X65, Hi-X55, Hi-X50, Hi-X25BT and Hi-X15 and favoured in press reviews.

The PG16 not only meets the highest gamer demands in terms of sound but also the hardware design: the robust metal construction of the headband and hinges ensures maximum stability and extremely long durability, the soft ear pads made of special "slow retention" memory foam and the low weight of just 265g offers optimal wearing comfort, even during long gaming sessions. The closed design with exceptionally good insulation effectively eliminates ambient noise, so you can concentrate fully on the game. In addition, the headset can be folded up in just a few simple steps, conveniently stowed away and safely transported in the supplied bag.

MAKING PASSION HEARD

Hi-X Driver Technology

When it comes to great sound, we don't compromise. The PG16 Pro Gaming headset uses the award-winning drivers of the Hi-X series. The development of Hi-X (High Excursion) technology is the result of decades of experience and state-of-the-art engineering. By reducing all moving mass, Hi-X drivers offer impressive dynamic characteristics and an extremely fast response.

The 44 mm Hi-X driver, with its vivid transients, reveals every sonic shade. Distortion-free reproduction down to the lowest frequencies allows for a linear and impressive natural reproduction of the low bass that's accurate, not exaggerated.

From 12 Hz to 24 kHz the full audible sonic spectrum is accurately reproduced with zero-latency. As What Hi-Fi noted in their five-star review of the Austrian Audio Hi-X15 headphones (on which the PG 16 is based): there is a "clear, open presentation" and "this transparency gives them a huge advantage over rivals."

Thanks to their 25-ohm impedance, the PG16 Pro Gaming headset always delivers the greatest possible performance, whether you're listening through laptop, desktop or gaming console.

You'll always have the crystal clear and precise sound you need to get fully immersed in your game.

AUSTRIAN AUDIO

Compatibility

Whether you are playing on PC, Mac®, PS4™, PS5™ or Xbox™, with the 1.4m long connection cable equipped with a 3.5mm TRRS (Tip Ring Ring Sleeve) jack plug, you will always find the right connection. Usefully, the cable is removable and can be easily replaced if you need a longer cable or in the rare case of a cable defect.

Aside from gaming the PG16 is an outstanding headphone for general media and leisure listening: simply fold up the microphone and enjoy your favourite music in the highest studio quality.

The PG16 offers excellent workmanship with high-quality materials and outstanding sonics at an unbeatable price-performance ratio.

Designed and developed in Austria.
